

**EL DORADO COUNTY
COMMUNITY DEVELOPMENT AGENCY
TRANSPORTATION DIVISION
FIVE YEAR TRAFFIC COUNT SUMMARY
2012 Through 2016**

The Five Year Traffic Count Summary is a compilation of the Annual Daily Traffic volumes reported in the Annual Traffic Count Summaries for the previous five years. Since a number of factors may impact count data collection from year to year, such as construction on neighboring roads, holidays, special events, etc., caution should be exercised when using this data for comparison purposes.

Annual Daily Traffic Counts are calculated by taking the average of a one to five day, non-holiday, weekday count

If a count location is counted more than once per year, then the number reported is the average of the Average Daily Traffic Counts for each individual count location

N.C. = No count due to one or more of the following reasons; construction, logging, fire, equipment failure

*** = Count was influenced by nearby construction**

^ = Count Volume listed was taken after the Silva Valley Interchange was opened.

The condition of every roadway in the County is evaluated, on average, every two to three years. The condition assessment process that the County uses is statistically based, nonbiased, and impartial. The process provides a consistent and accurate method for comparing pavement conditions throughout the County. A roadway's condition is ranked on a scale of one to one hundred.

A Pavement Condition Index (P.C.I.) of 70-100 is considered Good

A Pavement Condition Index (P.C.I.) of 50-69 is considered At Risk

A Pavement Condition Index (P.C.I.) of 25-49 is considered Poor

A Pavement Condition Index (P.C.I.) of 0-24 is considered Failed

Since roads are inspected on a two to three year cycle, not all Pavement Condition Index rankings reflect current values.
