DEPARTMENT OF TRANSPORTATION
FIVE YEAR TRAFFIC COUNT SUMMARY
2021 Through 2025**

The Five Year Traffic Count Summary is a compilation of the Annual Daily Traffic volumes reported in the Annual Traffic Count Summaries for the previous five years. Since a number of factors may impact count data collection from year to year, such as construction on neighboring roads, holidays, special events, etc. Caution should be exercised when using this data for comparison purposes.

Annual Daily Traffic Counts are calculated by taking the average of one to five day, non-holiday, weekday count

If a count location is counted more than once per year, then the number reported is the average of the Average Daily Traffic Counts for each individual count location

N.C. = No count due to one or more of the following reasons; construction, logging, fire, equipment failure

* = Count was influenced by nearby construction

Pavement Condition Index (P.C.I) is a measure of roadway pavement condition: 70-100 = Very Good, 50-69 = Good, 25-49 = Poor, 0-24 = Very Poor

Since roads are inspected on a two to three year cycle, not all Pavement Condition Index rankings reflect current values.
