

**EL DORADO COUNTY  
COMMUNITY DEVELOPMENT SERVICES  
DEPARTMENT OF TRANSPORTATION  
ANNUAL TRAFFIC COUNT SUMMARY  
2025**

Annual Daily Traffic Counts are calculated by taking the average of a one to five day, non-holiday, weekday count. Since a number of factors may impact count data collection from year to year, such as construction on neighboring roads, holidays, special events, etc. Caution should be exercised when using this data for comparison purposes.

If a count location is counted more than once per year, then the number reported is the average of the Average Daily Traffic Counts for each individual count location

\* = Count was influenced by nearby construction

The condition of every roadway in the County is evaluated, on average, every two to three years. The condition assessment process that the County uses is statistically based, nonbiased, and impartial. The process provides a consistent and accurate method for comparing pavement conditions throughout the County. A roadway's condition is ranked on a scale of one to one hundred.

A Pavement Condition Index (P.C.I.) of 70-100 is considered Very Good

A Pavement Condition Index (P.C.I.) of 50-69 is considered Good

A Pavement Condition Index (P.C.I.) of 25-49 is considered Poor

A Pavement Condition Index (P.C.I.) of 0-24 is considered Very Poor

Since roads are inspected on a two to three year cycle, not all Pavement Condition Index rankings reflect current values.

Road Name	Count Station	Mile Post	Location	Count Period	2025 Count	P.C.I.
